

# Preface

The *Weekly Coal Production (WCP)* provides weekly estimates of U.S. coal production by State. Supplementary data are usually published monthly in two supplements: the Coal Exports and Imports Supplement and the Domestic Market Supplement. This week's Coal Exports and Imports Supplement contains detailed monthly data on U.S. coal and coke exports and imports. The Domestic Market Supplement contains detailed monthly electric utility coal statistics, by Census Division and State, for generation, consumption, stocks, receipts, sulfur content, prices, and the origin and destination of coal shipments. This supplement also contains summary-level, monthly data for all coal-consuming sectors on a quarterly basis.

Preliminary coal production data are published quarterly, based on production data collected using Form EIA-6, "Coal Distribution Report." Based on 1988 and 1989 data, the coal production estimation error for a quarter at the national level (i.e., the difference between the sum of the weekly estimates for a quarter and the quarterly EIA-6 preliminary data) ranges from 1 percent to 4 percent for 1988 and 1 percent to 2 percent for 1989.

Final coal production data are published annually, based on the EIA-7A coal production survey. Based on 1988 and 1989 data, the revision error for a quarter at the national level (i.e., the difference between the EIA-6 preliminary data and the EIA-7A final data) ranges from 0.02 percent to 0.08 percent for 1988 and 0.09 percent to 0.14 percent for 1989.

This publication is prepared by the Coal Division; Office of Coal, Nuclear, Electric and Alternate Fuels; Energy Information Administration (EIA) to fulfill its data collection and dissemination responsibilities as specified in the Federal Energy Administration Act of 1974 (P.L. 93-275) as amended. *Weekly Coal Production* is intended for use by industry, press, State and local governments, and consumers. Other publications that may be of interest are the quarterly *Coal Distribution*, the *Quarterly Coal Report*, *Coal Production 1989*, and *Coal Data: A Reference*.

This publication was prepared by Wayne M. Watson and Michelle D. Bowles under the direction of Mary K. Paull and Noel C. Balthasar, Chief, Data Systems Branch. *Questions on energy statistics should be directed to the National Energy Information Center (NEIC) at 202/586-8800.*

## Summary

U.S. coal production in the week ended July 20 1991, as estimated by the Energy Information Administration, totaled 19 million short tons. This was 7 percent more than in the previous week, but slightly lower than in the comparable week in 1990. Production east of the Mississippi River totaled 11 million short tons, and production west of the Mississippi River totaled 8 million short tons.

U.S. coal exports in May 1991 totaled 10 million short tons, about the same as in May 1990. The amount of coal exported from January through May 1991 was 39 million short tons, slightly less than in the same period in 1990. Based on an average price of \$44.23 per short ton, coal exports were valued at \$1.7 billion.

Steam coal exports in the first 5 months of 1991 totaled 13 million short tons, which was 13 percent less than in the comparable period in 1990. Exports to Canada were down by 74 percent, reflecting the impact of the country's sluggish economy on coal-fired electricity generation. By comparison, U.S. steam coal exports to Europe rose by 15 percent to 9 million short tons. This increase of U.S. coal shipments helped offset a shortfall in the supply of European coal. The two leading destinations for U.S. steam coal exports to Europe were the Netherlands and Italy, together accounting for 50 percent of the total shipments to Europe. The Netherlands received 1 million short tons more than in the comparable period in 1990, accounting for most of the rise in U.S. steam coal shipments to Europe. Shipments to Spain were 373 thousand short tons, more than 6 times greater than in the first 5 months of 1990. Low-

sulfur coal from the Powder River Basin was exported to Spain for blending with Spanish lignite to meet air quality standards. By contrast, steam coal shipments to France were 57 percent lower than in the first 5 months of 1990, as some nuclear power plants that had been shut down for maintenance were returned to service, displacing coal-fired electricity. In Asia, Taiwan continued as the leading destination for U.S. steam coal, despite a 39-percent decline from the amount received in the first 5 months of 1990. Japan's receipts of U.S. steam coal ranked a close second, totaling 1 million short tons, an increase of 26 percent.

Metallurgical coal exports through May 1991 were 26 million short tons, about the same as a year earlier. Shipments to Japan, the principal destination, declined by 7 percent to 4 million short tons. Exports to Europe totaled 17 million short tons, slightly higher than in the first 5 months of 1990. The largest tonnage increases were to the United Kingdom, Bulgaria, and the Netherlands. The largest decrease was to Italy, where the amount fell by nearly 1 million short tons due to a decline in steel production. Shipments to Brazil rose 15 percent to 3 million short tons.

U.S. coal imports in the first 5 months of 1991 totaled 1 million short tons, 31 percent more than the same period in 1990. Coal imports were valued at \$48 million, based on an average price of \$48 per short ton. Colombia supplied 59 percent of the imports. Most of the balance was from Venezuela.

\*For quantity data, the value of the number is less than 0.5 thousand short tons. For percentage calculations, the absolute value of the number is less than 0.05 percent.

<sup>1</sup>Based on the U.S.-Canada Free Trade Agreement, as of January 1990, the U.S. Department of Commerce began reporting statistics on U.S. exports to Canada based on information on imports provided monthly by the Canadian government. For this reason the quantity and value for coal (metallurgical and steam) and the quantity for coke are no longer strictly comparable to the historical U.S. series.

<sup>2</sup>Includes countries with exports less than or equal to 50,000 short tons in 1990.

<sup>3</sup>Average price of all coal exports in this category.

Note: Total may not equal sum of components because of independent rounding. Average price is based on the free alongside ship (f.a.s.) value. The average prices presented in this table are considered to be representative prices for coal exports and fall within the range of \$28 to \$50 inclusively.

<sup>1</sup>Percent change calculation not meaningful as value is greater than 500.

<sup>2</sup>Based on the U.S.-Canada Free Trade Agreement, as of January 1990, the U.S. Department of Commerce began reporting statistics on U.S. exports to Canada based on information on imports provided monthly by the Canadian government. For this reason the quantity and value for coal (metallurgical and steam) and the quantity for coke are no longer strictly comparable to the historical U.S. series.

<sup>3</sup>Includes countries with exports less than or equal to 50,000 short tons in 1990.

Note: Total may not equal sum of components because of independent rounding.
